2nd assignment.

Camera raw filter:

In basic, a lot of properties such as temperature to adjust on that picture,tint,exposure and so on.well, all of them have been used to see the result.

2nd is cruves. Work same as regular curses tool . However, differnece is how it styled.

Detail is third one. Through sharpening and color noise reduction can change picture to funny art.

Color mixing,color grading ,kind of same. Both of them are implemented for to give change back and front side.

Optics. Has two properties ..only is seen doing work which is distortion. Well, it looks like cop image with huge zoom .try that if never used before.

Geometry..use either manual setting to change the picture as needed.

In the end, calibration,this property has process from version 1 to current of 5 version. (Going from top with shadows,red Primary, green

Primary,to bottom with blue Primary. With these ,only color can change.
